

AKAMAI UNIVERSITY

Institute for CAM Studies

University For Becoming More Fully Human

Based on Virginia Satir Growth Model and Energy Therapy

Welcome to Akamai University's Training PhD in Energy Psychology

Offered through AU's Affiliate Energy Medicine Partnerships
The Institute for CAM Studies

Dr. Mary Jo Bulbrook and Dr. Douglass Capogrossi

c

Energy Psychology blends the best of psychology with advances in energy therapies creating magical resources to elusive problems that face the mental health industry. This includes how to shift dynamics confronting individuals and families in a vast arena of topics – psychological roots to physical, mental, emotional and spiritual dynamics, addictions to alcohol or drugs, life transitions such as end of life, near death and spiritual transformative experiences, relief from trauma, wounded healers, relationship issues, financial and other stressor of life. What happens to the individual affect's family, friends, community and nations. This is not just a problem person but a larger dynamic to address that affects the person. Energy therapies provides unique knowledge and skills to address the above situations.

The storehouse of consciousness that regulates all aspects of life are the Energy Centers. Understanding this concept is critical to guide clients to an effective strategies to erase the blueprint of dynamics that shape who we are and who we become. In addition, learning about the central power current of our energy is critical to understanding where and how the “juice” or energy of life comes from and influences everything about our lives. The science is building to guide practice. It is extensive from when I started 50 years ago where I just pursued studying energy therapies because some of my faculty recommended doing it. Now I am “hocked” on the power and centrality of what this knowledge base has to offer the profession in their goal of supporting clients to health, healing and wellness.

Throughout my career as a mental health professional and educator of not only nurses but psychologists, physicians, social workers and others in the profession, I witnessed the strength of the inclusion of the science and practice of energy work applied to mental health care. Over my 50+ career in the mental health industry and 36+ energy therapy industry, marrying these two disciples has produced remarkable changes that are long lasting and impacting on a broader scale.

Yes, there is a learning curve for mental health professionals as well as the general public to make the transition to incorporate energy therapy theory and practice into mental health care. Yes, there is a learning curve for others to understand the integral nature or holistic approach to health includes an in-depth understanding of the what each has to offer and how they empower each other to have a deeper, faster and more lasting impact on the health and wellbeing.

Once of my mentors, friends and colleagues is the late Virginia Satir. She set the stage for the field of mental health to emerge out of the box into the arena of family systems care and family constellation. She saw visions of what was going on but did not have a framework of how to work with that data. It was only until the end of her life that she admitted to the channeling that was shared with her.

Over the years as Virginia grew, and the field of energy therapy grew. It became clear the distinctive patterns to consider. I have wedded these two distinct ways of looking at the world based on a wealth of experience and dynamics over the years as I served as a key role in the worldwide implementation of Virginia's model of care.

Virginia call for a "University for Being More Fully Human." At the time I had no clue what she meant which now I come to understand she foretold the power and role energy therapies would have on the mental health field. In my training called Transform Your Life the courses titles are: clearing the self, healing wounds, changing limiting beliefs, healing relationships, reshaping family energy patterns. Of course, these are not merely titles but blue prints of the role of energetic imprinting occurs that shapes who are and who we become. Our health is interwoven in our life experiences before, during and after life. Just this sentence creates a tremendous shift on the nature of humans and how we interact with them. Add data about animals, nature, various cultures and nations, and five elements of life: fire, water, earth, metal and air, we see a huge shift in interconnectedness and knowledge to influence psychology.

Join the AU, CAM, Energy Therapies and Energy Psychology team / faculty in a unique synergistic innovative educational process that is shaping the destiny of several health care industries. We would love to have you part of our process and innovative solutions to the future of world medicine, and health care.

The future of health care includes the following topics: efficiency, economic imperative, public demand, public satisfaction, safety, efficacy, access, ethics, humanitarian and socio-religious-cultural perspectives as well as the usual criteria in health and healing. We need to consider an integrated or holistic approach to body, emotion, mind and spirit; to individual, families, communities, nature; to the environment, culture, nation and political situation all in the equation to augment health and healing.

We welcome you and will do whatever we can to make your journey of development, learning and discovery an enjoyable one!

Dr. Mary Jo Bulbrook, BSN, RN, MEd., EdD, CEMP/S/I, HTCP & Instructor
Dean, Institute for CAM Studies, Program Director, Energy Psychology

TARGET AUDIENCE

Energy Psychology program is designed to serve the needs of a broad array of health care practitioners, (doctors, nurses, psychologists, mental health professionals, social workers, counselors, paramedics) energy-based practitioner of all persuasions and scholars. Also, those who are interested in these topics are welcome to participate in the program of study to augment your knowledge and skill as well as receive mentorship in the field. The training focus or tracks include:

- Virginia Satir Model with Energy Therapies,
- Near Death and Spiritual Transformative Experiences
- Choose Health Support
- Transform Your Life through Energy Medicine
- Transition Holistic Care
- Disaster Relief, Trauma, Wounded Healers, Grief & Loss
- Shamanism
- Multi-cultural Approaches to Health, Healing and Wellbeing
- Spiritual Development
- Parapsychology, Extra Sensory Perception
- End of Life – Hospice Care
- Family Constelations

Akamai University is accredited by the Accreditation Service for International Schools, Colleges and Universities (ASIC). Akamai has been designated as an ASIC Premier University for demonstrating several quality areas of strength and good practice. ASIC is a member of the British Quality Foundation (BQF), sits on the Quality Standards Group of UK NARIC, and is one of a number of international accrediting bodies listed in the international directory by the Council for Higher Education Accreditation (CHEA) in the USA and is a member of the CHEA International Quality Group (CIQG). ASIC is an approved accrediting body in compliance by the UK Border Agency (UKBA).

ASIC Accreditation provides reassurance to the UK Border and Immigration Agency that the college meets their strict requirements for overseas students and, in general, does not harm the perceived quality of the United Kingdom education provision.

[ASIC Premier University Certificate of Accreditation](#)

[Akamai University Listing in ASIC Accredited Colleges Directory](#)

According to the ASIC Accreditation Handbook, page 10: *Colleges which are deemed by the Accreditation Committee to have satisfied a number of indicators of commendable provision in identified sub-areas in each Area of Operation will be awarded a commendable grade for that Area and those colleges which are awarded commendable grades in at least six Areas, normally including Areas B, C, D and E, will be awarded Commendable overall. These colleges will have ASIC Premier College status.*

Under Hawaii law HRS446E, universities not yet accredited within the USA must publish the following disclaimer relative to its accreditation, even when highly recognized accreditation is achieved overseas. Akamai respects the State of Hawaii Office of Consumer Protection, in its attempt to protect the public and our potential students, and therefore Akamai shall continue to publish the disclaimer, now, even with ASIC Premier University accreditation.

Description of the ASIC accreditation [click here](#).

International Vocational Education and Training Association [IVETA]

IVETA is a membership association and network of vocational skills training organizations, business and industrial firms, vocational educators and other individuals and groups interested or involved in vocational education and training worldwide. IVETA is dedicated to the advancement and

improvement of high-quality vocational education and training wherever it exists and wherever it is needed. Akamai University was first admitted to membership on 4 March 2005. [IVETA Website](#)

PROGRAM RECOGNITION

The Akamai degree programs are recognized by the following associations and professional organizations, in addition to the training programs listed in the above section:

The Research Council for Complementary Medicine (RCCM) was founded in 1983 by a group of enthusiastic practitioners and researchers from both orthodox and complementary medicine. Today, their aim is to develop and extend the evidence base for complementary medicine in order to provide practitioners and their patients with information about the effectiveness of individual therapies and the treatment of specific conditions. Akamai was listed with RCCM beginning in 2004.

Innersource provides information and self-study programs for developing optimal health, personal growth, spiritual development, and well-being through Energy Medicine, Energy Psychology and Conscious Living programs for professionals, laypersons and students. Innersource also offers energy psychology information, research, and support, award-winning home-study training resources for professionals, laypersons, and graduate students. Innersource began collaboration with Akamai University on 29 March 2005.

The British Institute of Homeopathy is recognized as the largest, most successful school of homeopathic medicine in the world. Internationally recognized for excellence in education, it offers an outstanding curriculum, featuring a student body exceeding 11,000 residing in 80 countries. The British Institute of Homeopathy is best known for its exceptional, self-paced distance education courses, professional personal tutors and interactive lessons which makes for a thoroughly enjoyable educational experience for the dedicated student.

The Center for Traditional Medicine promotes the cross-cultural healing arts and sciences and advances social change to benefit individual and community health through activist scholarship, research and practice.

Energy Medicine Partnerships affiliate of Akamai University also has accreditation in their continuing education with the following:

ACEP - Approved Provider of Continuing Education by the Association of Comprehensive Energy Psychology (ACEP). EMP courses qualify as ACEP continuing education credit for a Diplomat in Comprehensive Energy Psychology (DCEP) or Certified Energy Health Practitioner (CEHP) recertification.

National Board for Therapeutic Massage and Bodywork - Approved Provider for Continuing Education by satisfying all the criteria put forth by the National Certification Board for Therapeutic Massage & Bodywork. Approved Provider #450986-09 til March 9, 2021.

Energy Medicine Practitioners and Specialists Programs have been added to the list of recognized programs effective August 19, 2008 through the Natural Health Practitioners of Canada (Praticens de la santé naturelle du Canada).

- Owen Owunwain*, Ph.D., Energy Psychology, Energy Medicine, Complementary Therapies
- Christina Ross, PhD, Energy Medicine, Energy Dynamics, Integrative Health, Research
- Robert Maladonado, PhD, Energy Medicine, Energy Dynamics, Integrative Health
- Kimberly Burnham, PhD, Energy Medicine, Integrative Health
- Douglass Capogrossi, PhD, Energy Medicine, Research
- Leslie Whitcomb, PhD, Eco-therapy
- Ester Coronel De Iberikleid, PhD, Energy Psychology, Energy Medicine

ENTRY REQUIREMENTS

As prerequisites for acceptance to the Doctor of Philosophy program, applicants should have completed the equivalent of a recognized Master's degree in an appropriate field of study and have several years of meaningful professional experience. Applicants admitted missing some elements of preparation must complete the missing elements as part of the initial program of studies at the doctoral level.

Applicants are expected to be proficient in collegiate English language skills and are expected to have access to a computer, email and the Internet, and outside library resources for the full extent of their program.

Completed training from a recognized energy therapy or psychological practitioner program can be applied toward the diploma or used as elements of the major concentration for the Doctor of Philosophy in Complementary and Alternative Medicine. Some higher-level programs of training are eligible for transfer for credit as part of the requirements for the major concentration discussed.

DEGREE REQUIREMENTS

Students in the Doctor of Philosophy in Energy Psychology will complete a minimum of 52 credits above the master's level including comprehensive examinations and a dissertation or major scholarly project. The coursework requirements include the academic major of psychology, the major concentration which can be a specific energy therapy program or specific specialty in psychology, research preparation, the dissertation or major scholarly project, and additional electives, as needed, to satisfy the minimum quality expectations.

The finishing activities for doctoral students include completion of a comprehensive examination at the conclusion of the academic coursework; preparations of a formal dissertation (or project) proposal, complete the dissertation (or major scholarly project), and preparation of the manuscript for faculty review. Doctoral students also complete an oral review of dissertation (or project) after the review of the physical manuscript.

The Doctoral degree expectations include the following elements of 52 credits above the master's degree:

- Core Elements (Required: 18 credits minimum)
- Special Concentration either in Psychology and / or Energy Therapies (Required: 12 credits minimum)
- Research Preparation (Required: 6 credits minimum)
- Comprehensive Examination (Required: 2 credits)
- Dissertation Proposal (Required: 4 credits)
- Dissertation Project (Required: 8 credits)
- Oral Review of Thesis (Required: 2 credits)

CORE COMPETENCIES (the following 18 credits)

Doctoral students in CAM must complete 18 graduate credits in core coursework in psychology and energy therapies comprising an academic major or the equivalent from another institution. These are the foundational competencies in theories, principles, practices, research, historical, philosophical, and social-cultural implications. These courses represent the core competencies and essential elements, which define your field of study and establish the underlying foundations upon which you may base your advanced professional development.

Required Core: (18 credits total with 9 required)

EPS / CAM 559: Innovative & Unconventional Approaches to Psychotherapy (3 credits)
EPS / CAM 577: Essentials of Energy Psychology (3 credits)
EPS / CAM 551: Spiritual Health and Healing (3 credits)
EPS / CAM 589: Process for Becoming More Fully Human (3 credits)
EPS / CAM 661: Self Integrated Care: Transform Your Life (3 credits)
EPS / CAM 586 Consciousness and Ethics in Care 3 credits

Energy Psychology / Energy Therapies / Complementary & Alternative Medicine (Choose 12 from this list)

The training focus or tracks can include:

- Virginia Satir Model with Energy Therapies,
- Near Death and Spiritual Transformative Experiences
- Choose Health Support
- Transform Your Life through Energy Medicine
- Transition Holistic Care
- Disaster Relief, Trauma, Wounded Healers, Grief & Loss
- Shamanism
- Multi-cultural Approaches to Health, Healing and Wellbeing
- Spiritual Development
- Parapsychology & Extra-Sensory Perception
- End of Life and Hospice Care
- Family Constellation

Suggested Coursework

- EPS / CAM 751-759: Field Study in CAM (3 - 6 credits)
- EPS / CAM 780: Specialty Theory & Application (3 credits)
- EPS / CAM 781: Specialty Practicum (3 credits)
- EPS / CAM 782: Specialty Special Project (3 credits)
- EPS / CAM 783: Specialty Directed Study -3 credits)
- EPS / CAM 526: Directed Intentionality, Prayer and Distance Healing (3 credits)
- EPS / CAM 528: Parapsychology and Transpersonal Psychology: (3 credits)
- EPS / CAM 552: Neurolinguistic Programming (NLP) Theory & Practice (3 credits)
- EPS / CAM 553: Hypnosis Theory & Practice (3 – 6 credits)
- EPS / CAM 507: Cross-cultural Healing Practices in Counseling & Psychotherapy (3 credits)
- EPS / CAM 563: The Integral Model and Philosophy of Self, Culture, and Nature (3 credits)
- EPS / CAM 565: Integral Psychology (3 credits)
- EPS / CAM 567: Somatics in Multicultural Perspectives (3 credits)
- EPS / CAM 569: Spirituality and Awareness of Cult Dangers (3 credits)
- EPS / CAM 555: Shamanism (3 credits)
- EPS / CAM 581: Fundamentals of Transpersonal Studies (3 credits)
- EPS / CAM 582: Wisdom Traditions: World Religions (3 credits)
- EPS / CAM 583: Human Development: Transpersonal Perspectives (3 credits)
- EPS / CAM 781-789 Directed Professional Studies (3 credits each course)

- EPS / CAM 561: Mind Resonance Process (3 credits)
- EPS / CAM 563: Child Development in Applied Eco-psychology (3 credits)
- EPS / CAM 578: Mind-Body Medicine I: Clinical Health Psychology (3 credits)
- EPS / CAM 579: Mind-Body Medicine II: Behavioral Medicine & Psychoneuroimmunology (3 credits)
- EPS / CAM 580: Mind-Body Medicine III: Integral Healthcare (3 credits)
- EPS / CAM 588: Psychology of Global Citizenship (2-3 credits)
- EPS / CAM 584: Personal Mythology and Dreamwork (3 credits)
- EPS / CAM 585: Consciousness & Sexuality (3 credits)
- EPS / CAM 587: Consciousness & Healing (3 credits)
- EPS / CAM 589: Paradigms of Consciousness (3 credits)
- EPS / CAM 590: Qualitative Research for CAM (3 credits)
- EPS / CAM 591: Consciousness & Creativity (3 credits)

RESEARCH PREPARATION (6 CREDITS)

Doctoral students must pursue studies providing advanced research knowledge necessary for success in their final projects (dissertation or major project in lieu of dissertation). At least three semester credits of research preparation coursework is required and this might focus upon quantitative and qualitative methods or participatory action research techniques including subject selection, research design, and statistical analysis, as appropriate to each student's proposed project. Through this requirement, students learn to effectively define applied problems or theoretical issues and articulate the rationale for the study. They should learn to present an effective scholarly review of the academic literature and implement quantitative, qualitative or participatory action methods for evaluating academic issues.

Required (6 credits required):

RES 591: Research Basics for Evaluating Energy Psychology / CAM / Energy Therapies* (3 credits)

RES 699: Research in Energy Psychology / CAM / Energy Therapies* (3 credits)

COMPREHENSIVE EXAMINATION EXM 980 REQUIRED (2 CREDITS)

Once students have completed the coursework elements of their degree, they will be asked to schedule the Comprehensive Examination. The primary mentor and a faculty member representing the secondary academic area conduct both the written and oral components of the examination. The written portion is open book style with selected essay questions requiring creative responses that reach for the higher levels of cognition. Your answers are expected to draw from both the primary and secondary competencies of your program with proper referencing of the scholarly literature. The oral component of the examination is normally overview of the scholarly literature that sets the foundation for the dissertation. Your research proposal should also include a brief manuscript outline that demonstrates how you will present in written form the various elements of the research project.

DISSERTATION PROPOSAL (4 CREDITS)

The purpose of this course is to write an approved doctoral dissertation in the standard format. The doctoral research / project proposal is devoted to the background and literature review and the second half to the design of the study. Must meet be approved by the students committee as led the committee chair.

Required: RES 985 Dissertation Proposal (4 credits)

DISSERTATION / PROJECT (8 CREDITS)

Following approval of your thesis / project proposal, you will begin your research. Your dissertation may take the form of a traditional research or as a project. Whichever approach to the research is chosen, the resulting work must demonstrate mastery of a body of knowledge in the major field of study, be your original work and represent a meaningful contribution to the betterment of the human condition or an improvement to the professional field. The dissertation is usually more than 150 pages long.

Your dissertation research may be conducted via quantitative, qualitative, or participatory action research or an original project. The body of your dissertation manuscript, structured according to a set of approved manuscript guidelines, should exceed 150 double spaced, typewritten pages.

Required: Dissertation RES 990 (Required: Minimum 8 credits)

ORAL REVIEW OF DISSERTATION (2 CREDITS)

Once you have prepared the thesis manuscript, you will be asked to schedule the formal review process. Your primary faculty advisor and a faculty member representing the secondary academic area will conduct both the formal physical review of the thesis manuscript and the oral review of thesis.

The physical review of the dissertation manuscript usually takes the review committee six to eight weeks. Each reviewer will prepare questions and commentary relative to your underlying review of the literature, the thesis methodology, the mechanics of your project, and your presentation of the findings, conclusions and recommendations.

The Oral Review of Dissertation is conducted under the direction of your primary faculty advisor with the assistance of one qualified member of the faculty. The examination is carried out by telephone conference call and is designed to allow detailed investigation of your dissertation.

Required: EXM 995 Oral Review of Dissertation (2 credits)

COURSE MODULE DESCRIPTIONS

EPS / CAM / ETH 600: Advanced Readings Energy Psychology / Energy Therapies / CAM (3 credits) Doctoral students pursue detailed readings in the theories, principles and practices in the area of interest. Readings include energy medicine, somatic studies, and spiritual healing, behavioral and life style medicine, holistic health, integrative healthcare, complementary medicine, homeopathic medicine, Ayurveda medicine, Chinese medicine, and herbal medicine, somatic studies. This course is required of doctoral students.

EPS / CAM / ETH 601: Spiritual & Intuitive Development (3 credits) This course critically examines the practices, evidence base, and implications of healing through applications of consciousness, intentionality, and prayer. Includes exploration of spiritual and intuitive development in various Energy Therapy Healing modalities.

EPS / CAM / ETH 602: Psychological Concepts Affecting Energy Therapy (3 - 6 credits) – Most energy therapy healing start with self-care for the person to grasp the application of the theory in one's personal life looking at physical, emotional, mental and spiritual dynamics across the life span. Often energy stays trapped and buried only to surface later. With this in-depth inward look and opportunity to apply energy therapies to improve one's health, the student can document the interventions they have learned as well as being introduced to some new ones. Transform Your Life through Energy Medicine (TYLEM) Self Care interventions will be introduced, practice and applied over time with a personal journal kept tracking changes that will be written up to demonstrate a clear understand of the process for clearing the self, healing wounds, changing limiting beliefs, healing relationships and reshaping family dynamics.

EPS / CAM / ETH 603: Advanced Anatomy & Physiology of the Human Energy System (3 credits) The advanced energy system analysis and interventions include: 12 chakras and 7 layers of the energy field with dynamics to each chakra, present, past and future, central power current, core star or soul essence, soul karma or soul memory, soul light and interfering energies, cords dynamics in the field, displaced central power current.

EPS / CAM / ETH 604: Ethics for Practice & Teaching Energy Psychology / Energy Therapy (3 credits) Energy Therapy Healing with psychology entrance has found its way into many health care practices based on ancient traditions. From the religious ceremonies that are performed in some churches to nurses practicing the healing art in an operating room, this

practice and its practical value are far from understood. What does science offer us with respect to touch healing as well as studying cultural perspectives regarding health and healing from a variety of traditions? Spirituality is a key part in the healing process and the cultural framework determines how this is integrated in health. This course allows the student the freedom to explore this subject without prejudices and address the ethics in all energy therapy healing.

EPS / CAM / ETH 605: Applications of Energy Psychology / Energy Therapy (3 credits)

Choosing a concentration that the student currently is trained in or another that he/she wishes to train clinical documentation of care is required. The theory and interventions of the chosen program are clearly articulated and documented as to how they evoke change in client's behavior. From the base of self-care, the next step is applying energetic work to others. This course fulfills this step.

EPS / CAM / ETH 751-759: Field Study in Energy Psychology / Energy Therapy Healing (3 credits)

Within the professional environment and through close contact with practitioners and "real world" situations, the Field Study (as a supervised practicum, apprenticeship, professional practice, advanced field study or other external exploration under the direction of program faculty and an approved field site sponsor) offers students 'real world experience' and applied field investigation skills into a core aspect of Energy Therapy Healing. Student participation should cover a minimum of 50 hours of field contact with the subject matter for each credit awarded. The field placement is expected to afford students appropriate practical hands-on experience and in-depth knowledge of their professions. Students opting for certification training should take should take ETH-DIR 781-789: External Specialty Training in Complementary Medicine.

EPS / CAM / ETH 771-779: Directed Professional Studies in Energy Therapy Healing (3 credits)

These courses provide students with opportunities for directed study covering advanced aspects of the discipline. Students study under the mentorship of qualified faculty assigned to guide the advanced reading course. In collaboration with the instructor, students select and pursue exhaustive advanced readings (e.g. extensive literature review) in the study of a carefully defined aspect of the discipline. An objective of the course is to allow students to make a valuable contribution to the body of knowledge in this field through completion of a scholarly paper suitable for publication (e.g. critical analysis, speculative theory, review article). A goal of this course is undertaking meaningful, contextually relevant, focused and throughout analysis of a particular area of theoretical and/or clinical importance.

EPS / CAM / ETH 780 External Specialty Training in Energy Therapy Healing Theory & Application (3 credits) The focus in this course is on the theoretical background and application of the complementary therapy concentration.

EPS/ CAM / ETH 781 External Specialty Training in Energy Therapy Healing Practicum (3 credits) The focus in this course is providing a supervised practicum for the practice of the complementary therapy concentration

EPS / CAM / ETH 782 External Specialty Training in Energy Therapy Healing Special Project (3 credits) The focus in this course is on a specialized application of the energy therapy concentration

EPS / CAM / ETH 783 External Specialty Training in Energy Therapy Healing Directed Study (3 credits) The focus in this course is on a topic of choice from the experience of the person and is open to innovative opportunities of the participant in the energy therapy healing.

Students pursue special "external" training via an approved Energy Psychology Healing training course offered at another accredited and approved institution during or prior to entrance at Akamai University.

An example would be professional courses (often for entry-level or continuing professional development and education certification) in Healing Touch (HT), Tapas Acupressure Technique (TAT), Emotional Freedom Technique (EFT), Transform Your Life through Energy Medicine (TYLEM), Touch For Health (TFH), Energy Kinesiology, Polarity Therapy, Wholistic Healing Effective and Effortless (WHEE), Neuro Linguistic Programing (NLP), Thought Field Therapy, Aromatherapy, Acupressure, Hypnotherapy, Reflexology, Yogi, Qigong, Mysticism, Buddhism, or Reiki. These recommendations of qualified training are under the collaborative supervision of qualified faculty from training sponsors, as appropriate. They include a psychological approach for care.

These course options are intended to allow students to add significantly to their advanced knowledge in the discipline through applied practical energy-based training under the leadership of qualified individuals and organizations. Additional documentation may be necessary to determine the current knowledge base of the applying student through interview, submitted documentation and / or additional course work.

Students begin the course of determining appropriate transfer credits with the preparation of a brief training proposal and identification of selective course work and training materials in support of the training. Approved training requires a completion certificate or letter of affidavit from the trainer or training organization. Training may also take the form of an on-the-job training, on-site internship, an apprenticeship or other formal or semi-formal training activity including professionally presented seminars, conferences, workshops, symposia and retreats that can document partial or all credits to be used

Additional acceptable Course offerings in the Energy Psychology Program, CAM, or Energy Therapy Healing Programs

EPS / CAM 500: Readings in Energy Psychology / Energy Therapies / CAM (3 credits) Graduate students pursue detailed readings in the theories, principles and practices of Complementary and Alternative Healthcare. Readings can include energy medicine, somatic studies, and spiritual healing, behavioral and life style medicine, holistic health, integrative healthcare, complementary medicine, homeopathic medicine, Ayurveda medicine, Chinese medicine, and herbal medicine depending on the primary interest and background of the

students. This course is required of all Master's students in Complementary and Alternative Medicine.

CAM 501: Essentials of Energy Medicine (3 credits)

This course provides a comprehensive overview in a specific field of Energy Medicine, including theory, research, developments, applied practice and methods of self-care and treatment. It surveys the core knowledge and skills required of Energy Medicine practitioners. The course will provide the student with core references and resources for the remainder of their studies. Prerequisite: Graduate standing, acceptance into a Complementary, Energy or Behavioral Medicine program.

CAM 502: Optimal Integral Health (3 credits)

This course is structured from the premise that most diseases encountered are really failures of our "doctor within". A breakdown of our natural defenses is caused when signals are ignored from our body that would enable us to halt an unhealthy process, and the balance between our mind, body, and spirit is disturbed. Many emotional and mental illnesses result from the same ignoring of warning signals. This course focuses on the implications of an Integral Health approach to the well being of the person on all levels-the physical, emotional, mental, and spiritual. This includes processes of healing in the broadest sense-nurturing, organizing, growing, and inspiring. This brings about movement not only towards Optimal Health but finding the balance between the body, mind and spirit that transforms lifestyles. From the perspective of Optimal Health, the student will be able to empower others more effectively when he/she can experience personally the change in their own lifestyles.

CAM 503: Principles of Naturopathy (3 credits)

This course provides a thorough, integrated and comprehensive survey of the theories, principles, and clinical applications of Naturopathy, particularly as applied to mind-body and behavioral health. This is a core required course of the Behavioral Naturopathy program, providing the foundational grounding necessary for advanced studies to follow. Prerequisite: Graduate standing, acceptance into a Complementary Medicine, Energy Medicine, Mind-Body Healing, Integral Health Studies, or Behavioral Naturopathy program.

EPS / CAM 507: Cross-cultural Healing Practices in Counseling and Psychotherapy (3 credits)

This course surveys several of the world's major traditional and healing systems as applied to mental and behavioral health, including historical, spiritual-religious and traditional cross-cultural healing principles and practices for mental health and hygiene. Issues pertinent to integrating traditional healing into mainstream behavioral healthcare are also examined. This is a core-required course of the Behavioral Naturopathy program. Prerequisite: Graduate standing, acceptance into a Complementary Medicine, Energy Medicine, Mind-Body Healing, Integral Health Studies, or Behavioral Naturopathy program. The student must have completed a course in Introductory Psychology AND an introductory course in Theories of Counseling and Psychotherapy.

CAM 508: Integral Healthcare (3 credits)

This course provides a thorough, comprehensive and up-to date survey of the emerging field of

Integral Medicine and practices in Mind-Body Healing, examining history, development, theory, principles, scope, research, key players and resources, applied methods transformational practice. This is flagship course of the three required core courses in the Integral Health Studies program, and is essential for placing your chosen studies and profession (the applied field) in context and perspective. Prerequisite: Graduate standing, acceptance into a Complementary Medicine, Energy Medicine, Mind-Body Healing or Integral Health Studies program.

EPS / CAM 510: The Embodied Mind (3 credits)

Where is the mind located? Ida Rolf taught that memories are in our muscles, and Candace Pert has found emotions in our bodies' neuropeptides. Ordinarily, the dominant paradigm regards the immune system as a scientific construct that seems distant from our felt experience, as something that cannot be sensed. Somatic therapists know that one way into the immune system is through the contents of the subconscious mind via bodywork. This course considers interaction among experience, memory, imagery, and the body. The course looks at foundational works for Somatic Studies, including the work of Reich, Feldenkrais, Alexander, Grindler, and Selver. The student will be invited to survey these writers and compose short essays on their work. Then the student will choose one theorist to study in depth to write a final 15-page paper for the course. Is the body experienced as a machine, as spirit made flesh, as manifestation of mind? With anatomy as ground, this course surveys the spectrum of experience and the meaning of image. Required reading includes Gorman's Moving Anatomy.

EPS / CAM 525: Touch Healing Practices & Ethics (3 credits)

Touch Healing has found its way into many health care practices based on ancient traditions. From the religious ceremonies that are performed in some churches to nurses practicing the healing art in an operating room, this practice and its practical value are far from understood. What does science offer us with respect to touch healing as well as studying cultural perspectives regarding health and healing from a variety of traditions? Spirituality is a key part in the healing process and the cultural framework determines how this is integrated in health. This course allows the student the freedom to explore this subject without prejudices and address the ethics in all touch therapies.

EPS / CAM 526 / ETH 526: Directed Intentionality, Prayer and Distance Healing (3 credits)

This course critically examines the practices, evidence base, and implications of healing through applications of consciousness, intentionality, and prayer.

EPS / CAM 528: Parapsychology and Transpersonal Psychology: (3 credits)

The course based in theoretical readings, PPS, video materials, scientific movies, books and articles, applied practices “ is an integrative one, explanatory and applicative too. The course is exploratory of a variety of para normal phenomena including the literature surrounding the field. Higher sense perception is one of the topics as well as astrology, telepathy and telekinesis, transmutation and levitation and reincarnation and transpersonal regression, near death experiences and spirits' connections.

CAM 529: Preventative Medicine (3 credits)

In China a patient used to pay the doctor as long as the patient remained in good Health. When

the patient got sick, he stopped paying the doctor. What are we doing in our medical systems about preventative medicine? Many insurers will reimburse you for expenses when you get sick, but not cover preventative measures. What do we understand about how to prevent illnesses? This course enables the interested student to explore this area.

EPS / CAM 530: Anatomy & Physiology of the Human Energy System (3 credits)

The basis for CAM theory and practice is the energy system and composed of the energy centers (chakras), energy field (aura), energy tracts (meridians), central power current (hara), radiant energy (core star), fragmented energies and interfering energies. This course presents the major writing and understanding of these elements with an opportunity to explore the interrelationships between and among various energetic systems. This course or the equivalent is foundation to understanding the scope of all CAM therapies.

CAM 531: Nutritional and Dietary Healing (3 credits)

Healing through diet is in common practice. Medical physicians practice some form of dietary healing especially with patients suffering from cardiac problems, but there is an entire school of thought about how proper diets not only can prevent illnesses, but reverse their course. There is much scientific evidence to support dietary healing, but what is really known about how and why some diets are preferable to others. This course will enable the student to pursue research in this subject.

EPS / CAM 533: Essentials of Qi Gong (3 credits)

Students are introduced to standing techniques, breathing and relaxing techniques, internal movement, healing techniques, internal and external exercises, Qi meditation, the healer within, and healing energy in everyday life.

EPS / CAM 540: Program Planning (3 credits)

Students who wish to pursue a concentration in the field of Energy Psychology and Complementary and Alternative Medicine would benefit from strategically planning their program so that it follows guidelines that can enhance their integrity as a CAM Healthcare professional. This course aims to support the nontraditional course work that is necessary for a CAM concentration with professional standards that have been set forth by the National Institutes of Health (NIH) National Center for Complementary and Alternative Medicine (NCCAM), as well as the core curriculum that serves the Allied Health professions and the U.S. Surgeon General toward acquiring licensing in many branches of the Health careers. With this, the overall program plan is tailored to meet the student's interests and needs.

CAM 541: Major Domains of Complementary Therapies & Research (3 credits)

Many professions, innovative programs and research initiatives are funded by Grants. In 1991, the National Institutes of Health established the Office of Alternative Medicine (OAM) to explore unconventional medical practices. The OAM has since been transformed into the NCCAM. Today the NCCAM has established major domains of practice in Complementary Alternative Medicine (CAM). This course aims to familiarize students with the standards that are unfolding in the U.S. national effort to integrate CAM into its present medical system and to include the understanding necessary to do research, and get funding for research in this area of study.

CAM 548 Homeopathic Medicine I: Materia Medica, Laws and Principles (3 credits)

Homeopathic medicine is an unconventional Western system that is based on the principle that "like cures like." This course serves the purpose of offering an overview of homeopathy and covers its origins, its basic principles, the use of various homeopathic remedies, including compatibility with other therapies. This course offers a comprehensive overview of the science, theory, applied principles and practices of homeopathy.

CAM 549 Homeopathic Medicine II: Repertory, Case Taking and Applied Practice (3 credits)

Homeopathic medicine is an unconventional Western system that is based on the principle that "like cures like." This course serves the purpose of offering an overview of homeopathy and covers its origins, its basic principles, the use of various homeopathic remedies, including compatibility with other therapies. This is a second course offering a continuation of the comprehensive overview of the science, theory, applied principles and practices of homeopathy.

EPS / CAM 551: Spiritual Health and Healing (3 credits)

The objective of this course is to provide students with the opportunity to explore the relationship between spirituality, Health, and healing given perspectives from world religions. This course focuses on the physiological, neurological, and psychological effects of healing resulting from spirituality. In addition to topics of interest initiated by the learner, the topics explored in this study include; African, Buddhist, Jewish, Catholic, Islamic, Hispanic-Pentecostal, Christian Science, Nursing, Intercersory Prayer, Neurobiological aspects related to the placebo-effect, and the power of belief.

EPS / CAM 555 / ETH 555: Shamanism (3 credits)

This course offers readings and experiences in the practice of shamanism. Journal entries, an annotated bibliography, and can include both theoretical and practical applications.

EPS / CAM 559: Innovative and Unconventional Approaches to Psychotherapy (3 credits)

Many clinicians find it useful to have a collection of psychotherapeutic techniques available to them when working with individuals and groups. This course serves the purposes of offering an overview various innovative forms of counseling and psychotherapy and provides the opportunity to investigate any of them in depth. In addition to topics of interest initiated by the learner, the topics explored in this study include; ego-state therapies, archetypal psychotherapy, Taoism and counseling, transcendental counseling, psychodrama, feminist therapy, hakomi therapy, and meditative states of therapy.

CAM 560: Advances in CAM (3 credits)

This course examines the history, paradigms and foundational assumptions of medical sciences and practices as they relate to research, practice and current developments in Energy Medicine. The evidence base of Energy Medicine is charted and discussed both from a historical perspective and the current state of the art in science and applied practice. A critical review of implications and future directions will round out the study.

EPS / CAM 561: Mind Resonance Process (3 credits)

The Mind Resonance Process(TM) (MRP) is a unique and powerful new approach to Energy

Medicine that accesses the Power of Love from the Heart Energy Field to effect not only emotional and physical healing but to reconnect to the blissful experience of one's Divine Self. MRP's applicability is immense; from deep personal healing, to distance healing, to spiritual renewal, and ultimately to global healing. This course will offer an opportunity to learn and apply the MRP process, recording its transformative and healing efficacy, and provide the learner with an opportunity to embark on publishable research in this new and exciting field of Energy Medicine.

EPS / CAM 562 / EHT 562: Child Development in Applied Eco-Psychology (3 credits)

Applying Eco-psychology contexts to the study of Child/lifespan Development as it occurs within primary life support and developmental support systems provided by local, regional, planetary and atmospheric ecosystems. The dynamics of Child/Lifespan development address activities of attachment, boundaries within attachment, separation and return to attachment after separation. These dynamics are expressed through basic stages of Child/Lifespan development such as maintenance of physiological equilibrium in infancy, face-to-face mirroring and symmetry at three months of age, parallel play in toddlerhood or the capacity to engage in imaginative, representational play beginning at the age of three. Address issues in trauma survival, recovery and potentials for healthy life-cycle development in the midst of severe situational deficits.

CAM 563: Integral Model and Philosophy of Self, Culture and Nature (3 credits)

This survey course offers an in-depth study of Ken Wilber's All Quadrants, All Levels Model of integral theory and practice. Participants will be introduced to an understanding of the found quadrants, states of consciousness, stages of development, lines of development and types. Students will be introduced to applications of the integral model to science and religion, world maps of the cosmos, as well as medicine and education. Participants will gain experiential understanding of this model by beginning an integral practice of their own using the guidelines presented.

CAM 564: Integral Healthcare and Lifestyle (3 credits)

Integral healthcare is an essential way to review the interface of body, emotion, mind and spirit interface in depth. Exploring essential qualities of life such as well-being, happiness, values, virtues, philosophy, love, service, suffering to mention a few will be investigated according to different values and approaches to these core topics. Relating these concepts to the individual student perspective will be foundation for an intrapsychic approach to health and healing.

EPS / CAM 565 / ETH 565: Integral Psychology (3 credits)

The theory and principles inherent in integral psychology will determine the paradigm that serves to guide the psychological orientation of the person. Designed as a survey course the student is free to explore the key writers in this field and explore different levels of consciousness including sub, super and extra ways of receiving knowledge in this world. Includes family dynamics, family constellation and mental health issues with substance abuse including reintegration from prison and breaking the school to prison pipeline.

CAM 566: Historical Perspectives on the Body (3 credits)

Just as descriptions of the body vary across culture, they also vary across time. Drawing from an array of readings from medical treatises to the writings of mystics to erotica, this course considers the construction of the human form from the Renaissance to the twenty first century.

EPS / CAM 567: Somatics in Multicultural Perspective (3 credits)

The goal in their course is to explore different views on the nature of the body from an European American culture that is egocentric view very individualistic and self-contained to the experience of the body as socio-eccentric interdependent and permeable. Descriptions various cultural experiences of indigenous people in relationship to the spirit will be included. Things such as soul retrieval, spirit extractions, exorcism and other natures of this are included

EPS / CAM 569: Spirituality and Awareness of Cult Dangers (3 credits)

The issue of cults has tremendous impact on the culture and health and healing. Some of these experiential transcultural manifestations will be examined in depth including a treatise on the nature of the person as envisioned in different cult communities.

EPS / CAM 577: Essentials of Energy Psychology (3 credits)

This course provides a state of the art introduction and comprehensive overview of the field of Energy Psychology research, theory and practice. The course emphasizes a directly experiential and applied approach to learning, such that the concepts and methods of Energy Psychology can readily be integrated into clinical practice for health and wellness professionals working with psychological issues and the body, emotion, mind and spirit integration.

EPS / CAM 578: Mind-Body Medicine I: Clinical Health Psychology (3 credits)

This class provides a practical and empirically focused study of the applied practice and methods of clinical health psychology in a variety of medical conditions and health concerns. The course will deal with research and clinically based methods that support and guide best practices for integrating psychological principles into healthcare practice. Prerequisite: An introductory course in Health Psychology, or permission of the instructor.

EPS / CAM 579: Mind-Body Medicine II: Behavioral Medicine and Psychoneuroimmunology (3 credits)

This course provides a practical survey of theories, practices and methods of Behavioral Medicine and the research developments in Psychoneuroimmunology and Behavioral Medicine that inform them. Prerequisite: An introductory course in Health Psychology, or permission of the instructor.

EPS / CAM 580: Mind-Body Medicine III: Integral Healthcare(3 credits)

The course provides a comprehensive introductory overview of the theories, principles, research, science, clinical and therapeutic methods of the growing mainstream models of Integral and Holistic Medicine in contemporary healthcare.

EPS / CAM 581 / ETH 581: Fundamentals of Transpersonal Studies (3 credits)

A foundational course for transpersonal studies begins with a comprehensive study of the field covering the key historical figures to present time. Include the contextual setting for this

evolution and how it impacted traditional health care. Examine the different traditions from other cultural perspectives as well.

EPS / CAM 582: Wisdom Traditions: World Religions (3 credits)

Health and healing is shaped by the predominant world religions as they set the course for the nature of the interrelationship of body, emotion, mind and spirit. Each faith tradition is either rigidly adhered to or loosely guides a person's life. From an indepth study of at least 7 world religions of your choice discuss the key teachers, their historical setting and influence worldwide if there is one.

EPS / CAM 583: Human Development: Transpersonal Perspectives (3 credits)

Address the historical and transpersonal perspectives surveying the key leaders in transpersonal studies field. Survey the key literature that defines the field and introduces the person to a broader perspective of the role of the mind and emotions in health and healing. Compare the findings with your personal world view that shapes your life as a health professional or interested lay person.

EPS / CAM 584 / ETH 584: Personal Mythology and Dreamwork (3 credits)

Exploration of the contributions of dream work on the self reflective journey that impacts body, emotion, mind and spirit. Address the teaching of Carl Jung and Jean Houston as a basis for this investigation as well as choosing frameworks of your choice. This experiential class uses the medium of dream work to guide their personal journey using storying telling process, affirmations, inner journey and dream interpretations. Based on the teachings of Virginia Satir, students will track the events and people that shape their life and destiny. The work of Carl Jung will be explored as well and Bulbrook's Transform Your Life through Energy Medicine. Students can use a creative process of their own choice as approved and guided with the faculty. Feinstein and Krippner book "The Mythic Path are additional resources to direct this intra psychic journey. Describe the prominent theories and principles that guide actions, health and healing.

EPS / CAM 585 / ETH 585: Consciousness & Sexuality (3 credits)

Sexually is imbedded in the psyche through both our karmic path, early conception and birthing imprinting, the family story as well as the life path especially in early childhood, teens and your adult. How a child is energetically shaped by his/her path is at times subtle influencing the life experience as an adult. An in-depth analysis of the personal story is one tool to be used as taught in Bulbrook's TYLEM program following the path of: clearing the self, healing wounds, changing limiting belief, changing relationships energetically and healing family energy patterns especially around sexually that was witnessed with the adults around and experiences. All levels of higher consciousness as shaped by the energy system will be examined and healed. This course is primarily a guided introspective journey exploring the energy system of the individual and attention to the role of consciousness as imbedded in the energy centers (chakras). The faculty oversees the process and guided the student on this intra-exploratory journey.

EPS / CAM 586 / ETH 586: Cross-cultural Consciousness and Ethics (3 credits)

The choices one makes in making personal decisions in life depend on the beliefs that guide a person's life and provide an ethical view of life, living, relationships, how we treat each other

and judgments of right and wrong. Adding a cultural perspective provides a different value of choice on these critical topics. Studying different cultures will open the world view to understand how a person guides their lives, shapes policy in every aspect of life. In health care ethical decision making is an essential ingredient safeguarding the public to right action.

EPS / CAM 587 / ETH 587: Consciousness & Healing (3 credits)

The role of consciousness into health and healing over the recent years has received prominent interest and shifted how health is practiced and taught. The separation of mind from the body that held the health care field for so long is now altered. New policies and approaches to health and healing have emerged. Examine the key literature that underlies your practice or interest in the transpersonal studies.

EPS / CAM 588: Psychology of Global Citizenship (3 credits)

Discover how our excessive separation from nature stresses our sensuous inner nature and initiates our personal and global troubles. Students learn to reverse this destructive process by mastering thoughtful sensory nature reconnecting activities that dissolve stress. They satisfy our deepest natural loves, wants, and spirit by genuinely reconnecting them with our sensory origins in nature, backyard or backcountry. Teach lasting leadership, education, counseling, and mental health skills that feelingly tap the "higher power" wisdom of Earth's creation process. The email and telephone contacts of the course enable students to let nature help them nurture warm interpersonal relationships, wellness, and responsibility on personal and global levels. Students relate the course methods and materials to their fields of interest in order to integrate these areas with the global ecosystem.

EPS / CAM 589: Process for Becoming More Fully Human (3 credits)

The foundation of this course is the work of the renown therapist Virginia Satir whose philosophy influenced and shaped the Transform Your Life through Energy Medicine developed by Dr. Mary Jo Bulbrook who was the first director of Satir's work with University of Utah in 1980. The teachings of Satir and her commitment to help individuals become more fully human will be the core of this work that will then lead to a personal analysis of ones life path and how to make changes and strengthen family bonds and families ties. The course integrates a range of readings and resources of the Satir influence as connected to Bulbrook's worldwide teachings illustrating the interwoven path of this work, psychotherapy and integral health.

RES 590 Qualitative Research for CAM (3 credits)

This survey course offers an in-depth study of qualitative research methods. Participants survey historical and theoretical foundations of qualitative research, explore major qualitative research strategies, and build an understanding of the art and science of collecting, analyzing, and interpreting qualitative materials. The course provides background on applied qualitative research, the politics and ethics of qualitative inquiry, and the major paradigms that inform and influence qualitative research.

CAM 591: Consciousness & Creativity (3 credits)

The role of consciousness especially as determined by the seven energy centers or chakras determines the full activation of the creative spirit. This investigation addresses different models of how creativity is activated, sustained and nurtured within and without. A model of coercion

or uplifting the soul on the opposite end of the continuum will help in the understanding of how to move forward and eliminate blocks to life and living. Bulbrook's model of clearing limiting beliefs is an helpful energetic perspective to address this topic.

CAM 600: Readings in CAM (3 credits)

Doctoral students pursue detailed readings in the theories, principles and practices of complementary medicine. Readings include energy medicine, somatic studies, and spiritual healing, behavioral and life style medicine, holistic Health, integrative Healthcare, complementary medicine, homeopathic medicine, Ayurveda medicine, Chinese medicine, and herbal medicine. This course is required of doctoral students.

CAM 601: Essentials of Energy Medicine (3 credits)

This time intensive (reading, writing and applied practice) and experiential course (with external examination of applied components) provides a thorough survey and comprehensive overview of the field of Energy Medicine, including theory, research, developments, applied practice and methods of self-care and treatment. This is a very time intensive course surveys the core knowledge and skills required of Energy Medicine professionals and is required of all Energy Medicine students (prerequisite for other EMD courses). The course will provide the student with core references and resources (and links to these) for the remainder of their studies. If the student has many professional commitments, it is recommended that no more than one additional course be taken while taking this course. Prerequisite: Graduate standing, acceptance into a Complementary, Energy or Behavioral Medicine program.

EPS / CAM 661: CAM Self Care (3 credits)

Most complementary therapies start with self-care in order for the person to grasp the application of the theory in one's personal life looking at physical, emotional, mental and spiritual dynamics across the life span. Often energy stays trapped and buried only to surface at a later time. With this in-depth inward look and opportunity to apply complementary therapies to improve one's health, the student can document the interventions they have learned as well as being introduced to some new ones. Transform Your Life through Energy Medicine (TYLEM) Self Care interventions will be introduced, practice and applied over time with a personal journal kept to track changes that will be written up to demonstrate a clear understand of the process. The energy system analysis and interventions include: 12 chakras and 7 layers of the chakras, energy field, present, past and future, core star or soul essence, soul karma or soul memory, soul light and interfering energies.

EPS / CAM 662: Complementary Therapies Clinical Application (3 credits)

Choosing a concentration that the student currently is trained in or another that he/she wishes to train clinical documentation of care is required. The theory and interventions of the chosen program are clearly articulated and documented as to how they evoke change in client's behavior. From the base of self-care the next step is applying energetic work to others. This course fulfills this step.

EPS / CAM 663: Specialist Training CAM (3 credits)

A student can choose to work with different age groups, different states of health and wellbeing in a chose specialty such as caring for those with cancer, empowerment with cancer, healing

grief / loss, dealing with trauma or wellness for all and design a special project of their choice or provide additional clinical work. The goal is to learn how to evaluate comprehensively the full energy system: energy centers (chakras), energy field (aura), energy tracts (meridians), central power current (hara line), divine light (core star) and other energies in the present, past and future time frames. Students must demonstrate the ability to clinically cover three clients over time using the Transform Your Life through Energy Medicine and another energetic framework of their choice and approved by the program chair .

RES 692 Scholarly Project or Paper Documenting Energy Psychology / Energy Therapy Healing / CAM (2 - 6 credits)

This class is to document a students' expertise in their area of energy therapies. The student is expected to produce a scholarly project or paper which clearly demonstrates that expertise. This is a guided course of independent study with mentorship from the student's chairperson and or an approved professional from the clinical field that the student chooses. A presentation at professional meetings may qualify in partial fulfillment of this requirement. A recent bibliography outlining the theory and describing the theory underlying the practice is required.

RES 699: Research in CAM & Energy Therapies (3 credits)

This course provides a comprehensive overview of research issues unique to Complementary Medicine (CAM) research, with emphasis on factors that need to be considered in assessing and planning CAM research. Methods of future research in CAM will be considered. Prerequisite: Graduate standing, Introductory Research Methods Course (Quantitative/Qualitative), Introductory Statistics Course.

Research Preparation

RES 500: Survey of Research Methods (3 credits)

This course inspects the foundational techniques of scholarly research. Topics explore sources of scholarly research literature, proper methods for evaluating research reports, fundamentals of qualitative and quantitative research methods.

RES 502: Understanding Research Journal Articles (3 credits)

Students study effectiveness and problems in collecting, analyzing, and interpreting data from studies and investigate the applicability and generalization of findings and the proper manner of presenting the details of their own research studies. Topics investigate the rigor or various research methods, replicability, bias, and validity issues, and the appropriateness of statements of findings and recommendations from research.

RES 504: Introductory Research Statistics (3 credits)

This course covers the basic statistical concepts, theory and methods in statistical research. Topics include variables, graphs, frequency distributions, measures of central tendency, measures of dispersion, probability theory, binomial, normal and Poisson distributions, statistical sampling theory, and statistical decision theory.

RES 506: Advanced Research Statistics (3 credits)

This course covers parametric and nonparametric hypothesis testing. Topics include sampling

theory, Chi-square test, least squares regression, correlation theory, non-linear regression, analysis of variance, Student's t-test, and various methods in nonparametric analyses.

RES 508: Qualitative Research (3 credits)

This course provides detailed study of qualitative research methods. Topics survey historical and theoretical foundations of qualitative research, explore major qualitative research strategies, and build an understanding of the art and science of collecting, analyzing, and interpreting qualitative information. The course provides background on qualitative research, the politics and ethics of qualitative inquiry, and the major paradigms informing qualitative research.

RES 510: Participatory Action Research (3 credits)

This course provides the foundational principles of participatory action research. Topics survey theoretical foundations of action research, the methodology and applications of PAR in contemporary culture. Students assess the rigor and usefulness of participatory action research.

RES 512: Effective Data Analysis (3 credits)

This course examines modern scientific data analysis including the elements of effectiveness in study design, data gathering, processing of statistics and interpretation of findings.

RES 520: Social Science Research Methods (3 credits)

This course examines essential issues in social science research. Topics include assessment of data gathering techniques using selected case studies from journal articles. Students learn to measure attitudes and performance, use tests in data gathering, contrast and compare uses of statistical and qualitative methods, and evaluate focus group research

RES 591: Research Basics for Evaluating CAM / Energy Therapy Healing (3 credits)

Required Master's student course to study in-depth foundational techniques of scholarly research in CAM. Topics explore key CAM research studies including a survey of the CAM scholarly research literature, proper methods for evaluating research reports, fundamentals of qualitative and quantitative research methods used in CAM.

Requirements for Major Concentrations (Required: Minimum 12 credits) Eligible to transfer credits from programs in Energy Medicine, Energy Psychology, Energy Kinesiology, Energy Dynamics, Transpersonal Studies, Intuitive Healing, Integrative Health

Required Finishing Activities for Doctoral Degree

Comprehensive Examination EXM 980 (Required: Minimum 2 credits)

Once students have completed the coursework elements of their degree, they will be asked to schedule the Comprehensive Examination. The primary mentor and a faculty member representing the secondary academic area conduct both the written and oral components of the examination. The written portion is open book style with selected essay questions requiring creative responses that reach for the higher levels of cognition. Your answers are expected to draw from both the primary and secondary competencies of your program with proper

referencing of the scholarly literature. The oral component of the examination is normally overview of the scholarly literature that sets the foundation for the dissertation. Your research proposal should also include a brief manuscript outline that demonstrates how you will present in written form the various elements of the research project.

Dissertation Proposal RES 985 (Required: Minimum 4 credits)

The purpose of this course is to write an approved doctoral dissertation in the standard format. The doctoral research / project proposal is devoted to the background and literature review and the second half to the design of the study. Must meet be approved by the students committee as led the committee chair.

Dissertation RES 990 (Required: Minimum 8 credits)

Following approval of your dissertation proposal, you will begin your research project. Your dissertation may take the form of a traditional research project. Whichever approach to the dissertation is chosen, the resulting project must demonstrate mastery of a body of knowledge in the major field of study, be your original work and represent a meaningful contribution to the betterment of the human condition or an improvement to the professional field. The dissertation is usually more than 150 pages long.

Your dissertation may be conducted via quantitative, qualitative, or participatory action research. The body of your dissertation manuscript, structured according to a set of approved manuscript guidelines, should exceed 150 double spaced, typewritten pages.

Oral Review of Dissertation EXM 995 (Required: Minimum 2 credits)

Once you have prepared the thesis manuscript, you will be asked to schedule the formal review process. Your primary faculty advisor and a faculty member representing the secondary academic area will conduct both the formal physical review of the thesis manuscript and the oral review of dissertation.

The physical review of the dissertation manuscript usually takes the review committee eight to twelve weeks. Each reviewer will prepare questions and commentary relative to your underlying review of the literature, the thesis methodology, the mechanics of your project, and your presentation of the findings, conclusions and recommendations.

The Oral Review of Dissertation is conducted under the direction of your primary faculty advisor with the assistance of one qualified member of the faculty. The examination is carried out by telephone conference call and is designed to allow detailed investigation of your dissertation.

THE DISSERTATION COMMITTEE

Formation of Dissertation Committee

Doctoral students have a Dissertation Committee of three qualified graduate faculty appointed to oversee and govern the student's program structure, progress of studies, comprehensive examinations and thesis / dissertation project

Responsibilities of Dissertation Committee

Under leadership of the Committee Chair, responsibilities of the Committee are as follows:

- Directing the preparation and approval of the student's plan for study, clarifying the timeline
- Assignment of faculty to provide instruction and to assist with the functions of the dissertation committee.
- Providing direction regarding the student's foundational studies, core studies, specialization, and research preparation coursework.
- Providing leadership by integrating appropriate research preparation coursework or assignments within the plan for study, distributing the coursework to appropriate faculty for instruction and advisement.
- Providing leadership for the written and oral components of the student's comprehensive final examination.
- Providing oversight, direction, and mentorship during the conduct of the student's research project and manuscript preparation.
- Providing leadership for the physical and oral reviews of the dissertation manuscript.
- Assist the student in making formal changes in the plan study and timeline for completion, by written addendum, as needed to assure effective progress throughout the program of study.
- Providing final approval for the student's dissertation and overall degree program and cooperate fully in building the appropriate archival records for the University.

Committee Appointment Schedule

The Committee Chair is appointed immediately following the student's registration and continues in charge of the student's program until final completion is recorded at the school of record.

While the secondary and tertiary members of the dissertation committee are identified and confirmed at the onset of the program, and listed in the plan of study, they become active later, just prior to the activities for which they are asked to participate.

Building the Student's Plan for Study

Immediately following registration, graduate students begin work with their assigned Committee Chair, in structuring their formal plan for study. The process determines and formalizes the elements of the student's doctoral program and the timeline for completion.

The plan for study includes the following essential elements:

- Designation of the degree major for the Study Plan
- Identification of the required array of coursework for each element of the program.
- Identification of the secondary and tertiary members of the dissertation committee.
- Appointment and notification of the course module instructors
- Acceptance of transfer courses for the student's program.

Timeline for completion of the degree program.

These activities require active participation in program planning by the student and may take considerable time to complete the dialogue and exchange of information. Students are strongly advised to discuss in detail the elements in the plan for study including the coursework, the examinations, and elements of research including the manuscript guidelines.

Once all of the decisions have been made concerning the plan for study, the student and Committee Chair sign the formal document. Copies of the document are sent to the University headquarters for entry to the permanent student record. The plan for study is then distributed to the participating schools and becomes the document that determines effective progress toward the degree. When the expectations laid out in the plan for study have been successfully accomplished, the student is recommended for the degree by the Committee Chair.

Students are alerted that the University can make no commitment to inclusion of course modules and assignment of instructors to a student program until after the plan for study has been fully processed and approved.

RES 990: Dissertation Project (8 credits)

This course governs the conduct of the dissertation project for the Doctoral level student. The dissertation is a major undertaking that is a demonstration of mastery of a field of study and an original contribution to the field. Usually more than 150 pages in length the final project may take any of several forms, depending upon the field of study and the expectations of faculty. This may be quantitative or qualitative research or participatory action research.

<http://www.akamaiuniversity.us/RES990DissertationResearch.pdf>

EXM 995: Oral Defense of Dissertation-Doctoral Students (2 credits)

This examination is an oral defense of the doctoral dissertation conducted by the graduate committee immediately following their reading of the dissertation manuscript. The process follows guidelines published by the University.

is a worldwide not-for-profit professional association devoted to fostering co-operative and multidisciplinary research and development as well as the application of knowledge in the fields of Complementary, Traditional and Integrated Medicine.

[National Center for Complementary and Alternative Medicine](#)

The NCCAM is one of the twenty-seven institutes and centers that make up the National Institutes of Health. NCCAM is dedicated to exploring complementary and alternative healing practices in the context of rigorous science, training complementary and alternative medicine (CAM) researchers, and disseminating authoritative information to the public and professionals.

[Prince of Wales Foundation for Integrated Health](#)

The Foundation for Integrated Health makes information about integrated healthcare available to patients, practitioners, press and the public through their website, quarterly newsletters, publications, news releases and seminars. The Foundation is encouraging the complementary healthcare professions to develop and maintain statutory or voluntary systems of self-regulation.

Journal of Accord Integrative Medicine (JAIM)

The mission of Journal of Accord Integrative Medicine is to integrate acupuncture, Chinese medicine, qigong, parapsychology and western medicine, with current scientific, theories, technologies and methods to imply for classic, current and future medicine. All current issues, theories, viewpoints, historical reviews, book reviews, basic research, and clinical research regarding to the biophysics, clinical bio-scientific implications, modern science, and western

medicine with acupuncture, Chinese medicine, qigong and parapsychology all are welcome to contribute.

For more information, please visit the [Journal's Website](#)

eCAM

Evidence-based Complementary and Alternative Medicine (eCAM) is an international, peer-reviewed journal that seeks to understand the sources and to encourage rigorous research in this new, yet ancient world of complementary and alternative medicine.

For more information, please visit the [Journal's Website](#)

PLoS Biology

PLoS Biology is a peer-reviewed, open-access journal published by the Public Library of Science (PLOS), a non-profit organization committed to making scientific and medical literature a public resource. PLoS Biology is ranked in the top-tier of life science journals by The Institute for Scientific Information (ISI), with an impact factor of 14.7.

For more information, please visit the [Journal's Website](#)

PLoS Medicine

PLoS Medicine believes that medical research is an international public resource. The journal provides an open-access venue for important, peer-reviewed advances in all disciplines. With the ultimate aim of improving human health, we encourage research and comment that address the global burden of disease.

For more information, please visit the [Journal's Website](#)

BMC Complementary and Alternative Medicine

BMC Complementary and Alternative Medicine is an open access journal publishing original peer-reviewed research articles in complementary and alternative healthcare interventions, with a specific emphasis on those that elucidate biological mechanisms of action. BMC Complementary and Alternative Medicine (ISSN 1472-6882) is indexed/tracked/covered by PubMed, MEDLINE, CAS, Scopus, EMBASE and Google Scholar.

New CAM Research Concept: Omics and Variable Responses to CAM: Secondary Analysis of CAM Clinical Trials

This initiative is intended to leverage NCCAM's investment in ongoing and completed clinical trials through examination of differences in genomics, proteomics, and metabolomics that may be responsible for variations in individual responses to CAM interventions. The concept was approved at the February 2, 2007 meeting of the NCCAM Advisory Council Meeting and will be developed into a future funding opportunity.

CAM ANNOUNCEMENTS

Euricam News

As well as trying to get CAM into FP7, Euricam has been in contact with a number of CAM professionals in Europe, EFCAM, EPHA, ECHAMP, most of which were present in Brussels. They have a new idea to promote a CAM Visibility project to enhance public awareness, giving them another lobbying instrument at hand. Please download the following letter and questionnaire for further details.

Integrative Health Newsletter from Natural Standard

Natural Standard provides a free monthly e-newsletter covering news and events on herbs, supplements, exercise, nutrition, complementary and alternative medicine modalities, practices, and policy. [Access Natural Standard Newsletters Online](#)

The Thieme Almanac 2007

The Thieme Almanac provides access to information and resources on topics in the international field of acupuncture and Chinese Medicine. It includes a wide range of information such as clinical articles, historical tidbits, research findings, an international survey of educational programs, listings of societies and organizations, and laws and regulations related to the field. The aim of the Almanac is to offer a voice for the field of acupuncture and Chinese Medicine and to develop greater cooperation and communication among its diverse parts. The Almanac seeks to become the resource of choice for practitioners, educators, interns, and students of acupuncture and Chinese Medicine.

For more information, visit [Thieme Almanac Website](#)

World Academy of Biomedical Technologies (WABT)

WABT's objective is to create a forum where scientists, engineers, doctors and industrial leaders

etc. can exchange views in a cooperative manner to assist in discoveries and transfer of information in the field of biomedical technologies, for the benefit of mankind. While we are aware that this particular website is not either research based or directly related to Complementary Medical research, we thought that as members you might be interested in it. It's a UN based website that is promoting environmentally sound policies. For more information, visit [World Academy Website](#)
